This versatile, simple, non-invasive ventilation system is designed with advanced technology to be accurate, reliable and easily upgraded. The BiPAP vision system offers inexpensive alternative forms of sub-acute therapy for patients and can eliminate the need for intubation in appropriate candidates. The integrated display screen uses easy-to-read real-time graphics in undulating shapes or bar scale formats to provide enhanced monitoring for caregivers. Auto-

Trak SensitivityT provides optimal sensitivity despite changes in breathing or chain leaks. CE marked the Medical Device Warning Directive: U.S. federal law restricts these devices for sale or on doctor's orders. Mountain State Biomedical ServicesContactIntegrated Display Screen IPAP Total Breathing Level Exhaled Minute Ventilation - Patient Triggered Breath Exhaled Tidal Volume EPAP Ti/Tot Peak Inspiratory Patient Pressure or Total Leaks Modes CPAP and S/T available to maintain airway traversal and provide ventilation pressure support. PAV/T (Proportional ventilation/time mode) helps to improve patient comfort and increased synchronicity of the patient/artificial ventilation apparatus by independently adjusting the volume and flow of care based on the patient's disease. Oxygen control up to 100% - Allows the mixing of oxygen in a block in concentrations ranging from 21-100% without the auxiliary oxygen tubes attached to the mask. Mask.
